Kelley,
Hope all is well with the Dimock crew. I have returned to the nest, and I am trying to finish some required online training today and tomorrow. I haven't spoken with [Ex. 4 - CBI] since I was up there. I'll give you a call on Thursday after I know more...

Hi Dave -

Just following up on John's message. I know you have been away - but now that you are back we would really like to move ahead on completing the RAD review. I recall that you were still reviewing data and that you were working with the SERAS folks in Edison (and NAREL) to get the data into Scribe with final qualifiers. Once the data is final in Scribe we need to prepare individual reports for each sampling location for review by our Region 3 tox as well as by EPA HQs. We also need to determine the best format for reporting the data to the residents. Maybe you can help us with that? When you have a chance please touch base to let us know the status of your review.

Thanks - Kelley

Dave,

I don't know what your plans are for Dimock...but they will be sampling this week so there would be no need to be on site. They are not doing any RAD sampling. [Ex. 4 - CBI] indicated that it would be helpful for the data valuator to meet with you and discuss RAD data, so the best place to go would be Edison.

They still need for you to finish up your review of the RAD data.

Give me a call and we can discuss this. Gary and I will be heading back to Cincinnati on Tuesday.

-John
